## Next Steps
INTRODUCTION

What is the Architectural Experience Program?

The Architectural Experience Program™ (AXP®) is an essential step in the path to becoming an architect. Through the AXP, you will learn about the daily realities of architectural practice, acquire comprehensive experience in basic practice areas, explore specialized areas of practice, develop professional judgment, and refine your career goals. The AXP is developed and administered by the National Council of Architectural Registration Boards (NCARB). In most jurisdictions, completion of the AXP is a requirement for initial registration (licensure). The AXP identifies the tasks that are essential for competent practice. The program is structured to prepare you to practice architecture independently upon initial registration.

Demonstrating Competent Performance

There are two methods of demonstrating competent performance of the AXP tasks. Most licensure candidates will complete the AXP by reporting hours. You will need to document a minimum of 3,740 required hours under the six experience areas to complete the program. Some tasks may be easier to complete earlier in your career, while others may take more time and experience to complete. You and your supervisor should work together to create a plan that best fits your goals and abilities.

At least half of your experience must be completed under the supervision of a qualified architect; however, there are many ways to complete the remainder of your AXP hours outside the employment of an architect. These opportunities will be covered in the experience settings section.

The second method of demonstrating competent performance of the AXP tasks is through an AXP Portfolio. This new method is intended for experienced design professionals who put their licensure on hold and allows you to demonstrate your experience through the preparation of an online portfolio.
INTRODUCTION

About NCARB

The National Council of Architectural Registration Boards (NCARB) is a global leader in architectural regulation, dedicated to helping professionals reach their career goals, providing key data about the path to licensure, and protecting the public’s health, safety, and welfare.

We are a nonprofit organization made up of the architectural licensing boards of 54 states and territories. While each jurisdiction is responsible for regulating the practice of architecture within its borders, NCARB develops and administers national programs for licensure candidates and architects to ensure they have the mobility to go wherever their career takes them.

To accomplish this, NCARB recommends and encourages national requirements for architectural licensure. We develop and recommend standards for the 54 licensing boards, who then issue licenses to applicants who meet their specific registration requirements.

NCARB Services

NCARB exists to help you advance from student to practicing architect, so our services span the many phases of your career—think of us as your professional guide. Whether you’re navigating the Architectural Experience Program® (AXP®), completing the Architect Registration Examination® (ARE®), or earning your NCARB Certificate, NCARB is here to help.

And with our secure digital filing system, we can store all your major milestones, including official transcripts, employment history, examination successes, and more—a safe record of all of your achievements and accomplishments, ready to be transmitted to the jurisdiction of your choice.
Registration (Licensure)

Before you can officially call yourself an architect, you have to earn your license. Once you do, you’ll prove to your firm and your community that you’re able to protect the health, safety, and welfare of those who live and work in the built environment. Each licensing board has its own set of requirements, but navigating them doesn’t have to be complicated. NCARB has developed a number of tools and resources to help you succeed in meeting your jurisdiction’s specific standards in the following three areas:

**Education**

The recommended first step to becoming an architect is finding a school that offers a professional degree in architecture from a program accredited by the National Architectural Accrediting Board (NAAB) or the Canadian Architectural Certification Board (CACB).

With over 120 schools to choose from, the NAAB can help you find a school that fits your vision—or you can take advantage of the education alternatives that some jurisdictions offer. More information about starting your education in architecture can be found in the Education Guidelines.

**Experience**

Licensure candidates also have to gain experience under the supervision of a practicing architect. The AXP provides the framework to guide you through earning and recording your professional experience—covering everything from site design to project management. And you can start reporting experience after graduating high school.

We know you’ll be busy learning the ins and outs of architecture. That’s why we offer a number of tools—including a free mobile app—that can help you log experience hours and understand the program requirements. And since completing the AXP is a core component for certification, you’ll be on your way to earning your NCARB Certificate, too.

Ready to start earning experience? All the information you need can be found in this document.

**Examination**

Another key part of becoming an architect is demonstrating your knowledge. The Architects Registration Exam (ARE) is the profession’s standard for assessing practice architecture. It’s another big step toward becoming a licensed architect.

Whenever you need a helping hand or inspiration, success stories are here to get you through the ARE. For example, the AXP Handbook can be a helpful resource.
INTRODUCTION

NCARB Certification

Following initial licensure, obtaining an NCARB Certificate ensures you can get the most out of your career in architecture. It provides mobility and signifies that you have met the national standards that guide the 54 licensing boards. With an NCARB Certificate in hand, it’s simpler to get licensed across jurisdictions—allowing you the freedom and flexibility to pursue your career and connect with clients regardless of location.

Benefits of the Certificate

Once you’ve earned your NCARB Certificate, you can take advantage of all the following benefits:

NCARB CREDENTIAL
Obtaining and maintaining an NCARB Certificate demonstrates that you’ve met national standards. You can now use the letters “NCARB” after your name.

RECIPIROCITY
The Certificate streamlines the process for obtaining a license in a new jurisdiction.

MOBILITY
Gaining reciprocity in multiple jurisdictions allows you the freedom to go wherever the work takes you.

COMPETITIVE EDGE
Setting yourself apart from other architects can be key for your career; the greater flexibility you’ll enjoy as a Certificate holder is often an important factor for firms when hiring and promoting.

SECURITY
As an NCARB Certificate holder, you don’t have to worry about record keeping—all your information is stored on our secure server, ready whenever you need it.

FREE CONTINUING EDUCATION
Earning continuing education hours in Health, Safety, and Welfare (HSW) has never been easier, thanks to NCARB’s online Mini-Monograph Series—free for Certificate holders!
GETTING STARTED

Establishing Your NCARB Record

In order to report experience for the AXP, you'll need an NCARB Record—a detailed, verified record of your education and experience, used to establish your qualifications for examination, registration, and certification. You'll also need an NCARB Record to start and complete the Architect Registration Examination (ARE) or apply for the NCARB Certificate.

Create Your NCARB Record

To create your NCARB Record, click Login to My NCARB (step 1) on the NCARB homepage. Then, click Establish Record (step 2). Once you have established your account, add the NCARB Record service. If you need additional time or information to complete the application, you can save it and return later.

In order to establish an NCARB Record and receive your NCARB Record number, you must complete the application and submit payment. Once you click submit, you will receive two emails. The first will confirm receipt of your payment. The second will assign your NCARB Record number and provide further instructions.

More information on the cost of establishing and maintaining your NCARB Record can be found on our fees page. All fees are subject to change, and are non-refundable unless otherwise noted. If you have applied for an NCARB Record in the past, please do not reapply. Instead, reactivate your existing Record by logging in to your NCARB Record online and selecting the Annual Renewal option. All renewals and reactivations are submitted online.
EXPERIENCE AREAS & TASKS

Experience Areas

The AXP includes 96 tasks that are typically performed in six experience areas. These tasks were established by the 2012 Practice Analysis of Architecture as the key items a licensure candidate should be capable of performing in order to practice architecture independently. You should use the AXP as a tool to help you gain the necessary experience to prepare you for the profession and beyond.

Six Experience Areas

EXPERIENCE AREAS & TASKS

Practice Management

Practice Management is where you'll gain experience running an architecture firm—including the ins and outs of managing a business, marketing your firm, securing projects, working with clients, and sustaining a positive and professional work environment.

Practice Management Tasks

Upon completing the AXP, you should be able to competently perform the following tasks:

- Adhere to ethical standards and codes of professional conduct
- Develop professional and leadership skills within firm
- Comply with laws and regulations governing the practice of architecture
- Prepare proposals for services in response to client requirements
- Prepare final procurement and contract documents
- Participate in community activities that may provide opportunities or design of facilities that reflect community needs
- Understand implications of project delivery technologies
- Develop procedures for responding to contractor requests (Requests for Information)
- Participate in professional development activities that offer exchanges with other design professionals
- Prepare marketing documents that accurately communicate firm's experience and capabilities
- Understand implications of policies and procedures: supervision of design work by architect in responsible charge/control
- Establish procedures for documenting project decision-making
- Maintain positive work environment within firm through cooperation, teamwork, and staff morale
- Develop procedures for responding to changes in project scope
- Develop and maintain effective and productive relationships with clients
- Establish procedures to process documentation during contract administration
EXPERIENCE AREAS & TASKS

Project Management

In Project Management, you’ll learn how to deliver projects that meet your contractual requirements, so you’ll be prepared to budget, coordinate, oversee, and execute a project.

Project Management Tasks

Upon finishing the AXP, you should be able to competently perform the following tasks:

- Participate in pre-construction, pre-installation, and regular progress meetings with design team
- Determine design fee budget
- Coordinate design work of consultants
- Collaborate with stakeholders during design process to maintain design intent and comply with owner specifications
- Determine project schedule
- Coordinate design work of in-house team members
- Understand implications of project delivery methods
- Prepare Architect-Consultant Agreement
- Prepare written communications related to design ideas, project documentation, and contracts
- Assist client in determining delivery method for construction of project
- Maintain compliance with established milestones
- Prepare Owner-Architect Agreement
- Assist Owner in obtaining necessary permits and approvals
- Perform constructability review to determine buildability, bidability, and construction sequencing of proposed project
- Conduct periodic progress meetings with design and project team
- Establish methods for Architect-Client communication based on project scope of work
- Identify changes in project scope that require additional services
- Manage modifications to the construction contract
- Manage information exchange during construction
- Perform constructability reviews throughout the design process
- Perform quality control documentation process
- Define roles and responsibilities of team members
- Determine scope of project
- Manage project-specific tasks
- Monitor performance of team consultants
- Evaluate appropriate tools for project management
- Present design concept
- Submit schedule of work to Owner for each phase
- Resolve conflicts that arise during construction
- Prepare staffing plan
- Manage implementation
- Assist client in selecting...
**Experience Areas & Tasks**

### Programming & Analysis

Programming & Analysis is the first phase of a project, often referred to as pre-design. You'll experience tasks related to researching and evaluating client requirements, building code and zoning regulations, and site data to develop recommendations on the feasibility of a project.

### Programming & Analysis Tasks

Upon finishing the AXP, you should be able to competently perform the following tasks:

- Determine impact of applicable zoning and development ordinances to determine project constraints
- Gather information about community concerns and issues that may impact proposed project
- Analyze existing site conditions to determine impact on facility layout
- Evaluate results of feasibility studies to determine project's financial viability
- Determine impact of environmental, zoning, and other regulations on site
- Establish sustainability goals affecting building performance
- Prepare diagrams illustrating spatial relationships and functional adjacencies
- Establish project design goals
- Prepare site analysis diagrams to document existing conditions, features, infrastructure, and regulatory requirements
- Consider recommendations from geotechnical studies when establishing design parameters
- Assist owner in preparing building program including list of spaces and their characteristics
- Develop conceptual budget
- Gather information about client's vision, goals, budget, and schedule to validate project scope and program
- Evaluate opportunities and constraints of alternative sites
- Assess environmental impact to formulate design decisions
- Determine impact of existing transportation infrastructure on site
- Consider results of environmental studies when developing site alternatives
- Review legal documents related to site to determine project constraints
EXPERIENCE AREAS & TASKS

Project Planning & Design

Project Planning & Design covers the schematic design phase of a project. You’ll learn to layout the building design, review building codes and regulations, coordinate schematics with consultants, and communicate design concepts with your client.

Project Planning & Design Tasks

Upon finishing the AXP, you should be able to competently perform the following tasks:

- Perform building code analysis
- Develop sustainability goals based on existing environmental conditions
- Prepare code analysis documentation
- Define requirements for site survey based on established project scope
- Select materials, finishes, and systems based on technical properties and aesthetic requirements
- Determine design parameters for building engineering systems
- Prepare design alternatives for client review
- Present design ideas to client orally
- Oversee design integration of building components and systems
- Evaluate results of feasibility studies to determine project’s technical viability
- Review local, state, and federal codes for changes that may impact design and construction
- Prepare Cost of Work estimates
- Determine impact of existing utilities infrastructure on site
- Apply principles of historic preservation for projects involving building restoration or renovation
- Understand implications of evolving sustainable design strategies and technologies
- Design landscape elements for site
- Develop mitigation options to address adverse site conditions
EXPERIENCE AREAS & TASKS

Project Development & Documentation

In Project Development & Documentation, you'll gain experience with projects after the schematic design has been approved—focusing on construction documents and coordinating with regulatory authorities to gain the necessary approvals for construction.

Project Development & Documentation Tasks

Upon finishing the AXP, you should be able to competently perform the following tasks:

- Communicate design ideas to the client graphically
- Prepare submittals for regulatory approval
- Communicate design ideas to client with two-dimensional (2-D) computer aided design software
- Select furniture, fixtures, and equipment that meet client's design requirements and needs
- Communicate design ideas to the client using hand drawings
- Communicate design ideas to client with three-dimensional (3-D) computer aided design software
- Update Cost of Work estimates
EXPERIENCE AREAS & TASKS

Construction & Evaluation

In Construction & Evaluation, you’ll get involved with the construction administration and post-construction phases of a project—this includes being out on the job site; meeting with contractors, clients, and building officials; and punching lists, leading to the completion of your project.

Construction & Evaluation Tasks

Upon finishing the AXP, you should be able to competently perform the following tasks:

- Review shop drawings and submittals during construction for conformance with design intent
- Respond to Contractor Requests for Information
- Complete field reports to document field observations from construction site visit
- Review results from field reports, third-party inspections, and other test results for conformance with contract documents
- Review Application and Certificate for Payment
- Manage project close-out procedures and documentation
Documenting Your Experience Through Hours

In order to document your experience, you'll need to submit reports of your hours under each experience area. These reports must be submitted within an eight-month period in order to gain full credit.

**Eligibility Requirement**

In order to be eligible to participate in the AXP, you must have successfully earned a high school diploma or an established equivalent.

**Required Hours**

To complete the AXP, you must meet the required number of hours for each of the six experience areas. For each experience report, you'll need to competently perform tasks defined in one or more of the experience areas.

<table>

Documenting Your Experience Through Hours

Experience Settings
Your experience reports will fall under one of two experience settings: setting A or setting O.

These settings separate your experience into two categories:

- A: Work performed for an architecture firm.
- O: Experiences that can be performed outside an architecture firm.

They serve to define the type of organization, the work performed, and who verifies the experience.

Experience Setting A: Practice of Architecture

1,860 hours minimum
You must earn a minimum of 1,860 hours in experience setting A. There is no maximum number of hours you may earn in this experience setting.

In order to qualify, these hours require direct supervision by an AXP supervisor licensed as an architect in a U.S. or Canadian jurisdiction in an organization engaged in the lawful practice of architecture.
Documenting Your Experience Through Hours

Experience Setting O: Other Experience Opportunities

If you are not currently working for an architecture firm, there are many other opportunities for earning the required hours to complete the AXP. Some of these experiences require employment, but others do not. There is no minimum number of hours required for this experience setting, although many of the opportunities have a maximum limit.

Documenting Your Experience Through Hours

Employment Requirements

To earn experience in setting 8 or work-related setting O opportunities including: “Other Work Experience Under Licensed Professionals,” “Design or Construction Related Employment,” and some scenarios in “Construction Work,” you must be employed.

- Unpaid internships are not eligible to earn experience hours with the exception of the approved Community-Based Design Center/Collaborative as defined in experience setting O.
- No experience may be earned outside of the U.S. or Canada, except at an organization engaged in the practice of architecture or an approved Community-Based Design Center/Collaborative as defined in experience setting O.
- If the employment situation earns academic credit or is a requirement for a class, it can still qualify for AXP hours. Only employment situations qualify for AXP in this condition. The experience needs to be in compliance with the employment requirement and submitted as per the AXP rules.
AXP Supervisor

Your AXP supervisor is the individual who supervises you on a daily basis and has professional knowledge of and responsibility for your work. Your AXP supervisor is required to certify that the information you submit on your experience report is true and correct and that you performed the tasks competently.

AXP supervisors are usually registered architects; however, in certain experience opportunities, your AXP supervisor may be a professional from another discipline.

In experience setting A and the opportunities within O that require your AXP supervisor to be licensed, your AXP supervisor must have an active license at the time the experience occurred. However, your supervisor does not have to be registered in the jurisdiction where they or you are located. You may have multiple supervisors over the course of your experience.

Direct Supervision

To earn experience hours in workplace settings described in this document, you must work under the direct supervision of an AXP supervisor. Your supervisor must verify your experience and foster a professional relationship that is grounded in a direct professional association.

“Direct supervision” of an AXP participant must occur either through personal contact and/or remote communication (e.g., email, online markups, webinars, Internet), provided that your supervisor maintains control over your work and has sufficient professional knowledge to determine the competency of your performance.

Mentor

You may have many mentors throughout your career—these can be loyal advisors, teachers, or coaches. In the AXP, there are opportunities for your mentor to certify certain experience opportunities and provide guidance in your professional development.

In order to qualify for these opportunities, your mentor must hold a current license to practice architecture in a U.S. or Canadian jurisdiction; however, your mentor does not have to be registered in the jurisdiction where they or you are located.
Documenting Your Experience Through Hours

Reporting Requirement

All AXP experience must be reported within the required amount of time.

Experience must be submitted through the online reporting system or My AXP mobile app (free for iPhone and Android). To earn full credit for experience, you must submit all experience in reporting periods of no longer than six months and within two months of completion of each reporting period.

Experience reported beyond this eight-month period will be accepted at a reduced value of 50 percent toward the AXP requirements for up to five years after the date of the experience. After that time, the experience will no longer count toward your AXP hours.

Provisions have been made for reasonable extensions to the two-month filing period. For more information on the reporting requirements and extensions, please refer to the NCARB website.
DOCUMENTING YOUR EXPERIENCE

Documenting Your Experience Through Hours

Experience Setting O

OTHER WORK EXPERIENCE UNDER LICENSED PROFESSIONALS

You may earn up to 1,860 hours for working in any combination of the following employment settings:

For experience gained in the United States or Canada:
- Direct supervision by an individual licensed as an architect in a U.S. or Canadian jurisdiction in an organization not engaged in the practice of architecture.
- Direct supervision by an individual licensed in a U.S. or Canadian jurisdiction as a landscape architect or engineer (practicing as a structural, civil, mechanical, fire protection, or electrical engineer in the field of building construction)

For experience gained outside of the United States or Canada:
- Direct supervision by an architect not registered in the United States/Canada engaged in the practice of architecture.

DESIGN OR CONSTRUCTION RELATED EMPLOYMENT

You may earn up to 320 hours for working in design or construction related employment. Only experience that aligns with the AXP tasks can qualify for AXP hours.

Design or construction related activities qualify under the direct supervision of a person experienced in the activity of:
- Analysis of existing buildings
- Planning
- Programming
- Design of interior space
- Review of technical submissions
- Management of building construction activities

No license is required for the AXP supervisor for experience gained in this opportunity.
Documenting Your Experience Through Hours

... EXPERIENCE SETTING O CONTINUED

Community-Based Design Center/Collaborative

You may earn up to 320 hours for volunteer service in support of a pre-approved charitable organization outside of a recognized experience setting or academic requirement.

Community-Based Design Center/Collaborative organizations must apply to NCARB and be pre-approved by NCARB before the experience occurs.

To be considered as a recognized organization, the Community-Based Design Center/Collaborative must meet the following criteria:

- The organization must have 501(c)(3) status as a charitable organization.
- The work must be in support of “building” or “planning” projects.
- The organization must have an established ongoing relationship with an architect who can be responsible for your direct supervision. This architect will be considered the “designated AXP supervisor” for the organization.
- The work performed by the organization must be documented as related to the AXP experience areas and certified by the “designated AXP supervisor” as directly related to the practice of architecture.

CSI Certifications: CCS & CCCA

Whether or not you are employed, you may earn hours for completing the following CSI certifications:

**CSI Certified Construction Specifier (CCS):** 40 hours in Project Planning & Design for passing the CCS certification.

**CSI Certified Construction Contract Administrator (CCCA):** 40 hours in Construction & Evaluation for passing the CCCA certification.

Information regarding the Construction Specifications Institute is available at [www.csi.net](http://www.csi.net).
Documenting Your Experience Through Hours

Design Competitions

You may earn up to 320 hours for completion and submission of a design competition entry outside of a recognized experience setting or academic requirement.

Competitions completed for a firm while employed count for AXP credit under the related experience setting.

The design competition must be completed under the supervision of a mentor and meet the following criteria:

- Align to at least one of the AXP tasks
- Be for a “building” or “planning” project
- Be a formally structured competition with specified submission requirements
- Sponsored by a recognized business entity, governmental agency, or professional association
- You must be appropriately credited on the competition entry

WORK PRODUCT

You must retain copies of all documentation related to design competitions completed for AXP credit for a period of at least three years beyond the date the experience is approved by your mentor.

REQUIRED DOCUMENTATION

- You must upload a complete Design Competitive online reporting system.
- The competition entry must be completed and with the published design competition requirement

EXPECTATIONS

AXP participant

- Select appropriate competition with mentor approval
- Develop competition entry
- Review work with mentor on a regular basis
- Submit competition entry
- Complete the verification form
- Document experience through the online report verification form

Mentor

- Approve competition selection
- Review competition work with AXP participant
- Review final competition entry prior to submission
Documenting Your Experience Through Hours

... EXPERIENCE SETTINGS CONTINUED

NCARB’s Professional Conduct Monograph

Up to 10 hours in Practice Management

You may earn 10 hours in Practice Management by reading the full NCARB Professional Conduct Monograph and passing the related quiz. Or, you may earn 1-2.5 hours in Practice Management by reading each of the NCARB Professional Conduct mini-monographs and passing the related quizzes.

NCARB monographs are written by experts in their fields and explore topics relevant to architectural practice. They may be completed by architects to satisfy their continuing education requirements or by licensure candidates for AXP credit. If you complete an NCARB monograph for AXP hours, you will not be eligible to repeat the monograph for continuing education credit for license renewal.

Site Visit With Mentor

You may earn up to 40 hours in Construction & Evaluation for visiting construction sites with your AXP mentor.

The site visit must be outside of a recognized experience setting.

EXPECTATIONS OF MENTOR

- Opportunities to see the progress of a job over time are ideal; however, single visits to a site are acceptable
- The experience should be interactive with opportunities to discuss how issues related to the specific project were resolved
- The discussion should include why particular design decisions were made

EXPECTATIONS OF THE AXP PARTICIPANT

- You should be able to review and discuss the project relative to the drawings
- You should interact with members of the design and construction industry involved in the project
DOCUMENTING YOUR EXPERIENCE

Documenting Your Experience Through Hours

... EXPERIENCE SETTING O CONTINUED

AIA Continuing Education for Health Safety Welfare (HSW)

You may earn up to 20 hours per experience area by completing AIA-approved continuing education resources and programs that qualify for HSW. Self-reported continuing education is not eligible for AXP credit. One AIA HSW learning unit earns one AXP hour.

DOCUMENTING AIA CONTINUING EDUCATION

- If you are not an American Institute of Architecture Students (AIAS) or AIA Associate member, you may obtain a temporary AIA customer number by completing the webform at www.aia.org. Contact the AIA at emergingprofessionals@aia.org with any additional questions.
- If you are an AIAS or AIA Associate member, you may use your member number to report continuing education.
- You must upload your AIA transcript documenting completion of AIA continuing education when reporting your continuing education. Certificates of completion cannot be accepted. Your AIA transcript is available at www.aia.org/education.
- Once reported, AIA continuing education is reviewed and approved by NCARB.
DOCUMENTING YOUR EXPERIENCE

Documenting Your Experience Through Hours

... EXPERIENCE SETTING O CONTINUED

Construction Work

You may earn up to **320 hours in Construction & Evaluation** for construction work performed in either of two scenarios:

- Paid position meeting the AXP employment requirement
- Volunteer service at a nonprofit organization

GENERAL EMPLOYMENT SCENARIOS

Qualifying construction activities include "hands-on" experience working for a variety of organizations including, but not limited to:

- General contractor
- Subcontractor
- Fabrication shop
- Materials supplier
- Manufacturers (doors, windows, etc.)
- Developer/development corporation
- School district or higher education physical plan or facilities department
- Facilities department for a private corporation
- Military construction battalion (e.g. Navy Seabees)
- Disaster relief efforts
- Nonprofits (e.g. Habitat for Humanity, Community Development Corporation, Youth Corps, religious/multi-denominational development corporations, neighborhood housing services)

TYPES OF CONSTRUCTION WORK

Qualifying construction activities include "hands-on" experience working in a variety of scenarios including, but not limited to:

- Building layout
- Framing
- Roofing
- Concrete and masonry
- Painting and finishing
- Drywall and plastering
- Flooring
- Tile setting
- Wiring and equipment installation
- Ductwork/ mechanical equipment installation
- Plumbing and fixture installation
- Site clearing and preparation
- Backhoe operation, grading, etc.

APPROVAL OF CONST

An AXP supervisor who is in direct supervision and activity being performed manager, etc.) must certify experience. Your AXP supervisor must be licensed to certify you.
DOCUMENTING YOUR EXPERIENCE

Documenting Your Experience Through Hours

Best Practices for Completing the AXP Through Documenting Hours

When searching for an architecture firm, make sure the firm has opportunities for you to gain experience in all of the tasks and areas necessary to complete the AXP.

While working, have regular meetings with your supervisor to go over your progress in completing the AXP and develop a plan to finish the program in a timely manner.

THINGS TO DISCUSS:

- How often should you be reporting hours to your AXP supervisor
- Upcoming projects and experience opportunities that would help you finish the AXP
- Experience opportunities in the office

Record your hours daily using the timesheet method in the online reporting system or mobile app and submit your hours to your AXP supervisor in blocks of two months or less. These shorter blocks allow you to keep better records of your progress and allow you to make adjustments with your supervisor as needed.

Never leave employment at an office prior to making sure your AXP supervisor approves all your experience gained under their supervision. When you are no longer working for an office, it can become more difficult to get your former supervisor to approve hours you have submitted.

Do not take your timesheet history into the AXP experience. The AXP is not a measurement of how much work you spend at work. In order to successfully complete the program, you must complete the tasks listed in each of the areas. If your office work falls short of the requirements, then those hours documented for AXP (i.e. tracking hours that go beyond the basics of the job) will not be credited towards the AXP program.
Documenting Your Experience Through the AXP Portfolio

This method of documenting AXP experience is meant for experienced professionals who have worked for firms in the past and are currently unable to complete the AXP due to the reporting requirement. Through the portfolio, you will submit to your supervisor/mentor exhibits of completed work to demonstrate competency in each of the 96 tasks required by the AXP.

To complete the AXP through this process, you will need to meet all the AXP requirements through the portfolio. In other words, you cannot complete the experience requirement through a combination of reporting hours and the AXP portfolio. You can still participate in the portfolio option if you have submitted hours, but they will not count toward the portfolio requirements.

Eligibility

To be eligible to complete the AXP through the portfolio, you must meet each of the following requirements:

- Do not hold a license to practice architecture in any of the 51 NCARB jurisdictions or Canada
- Have a minimum of two years of experience that meets the requirements of the AXP that is older than five years, as defined in employment history
- Have a current architect supervisor who meets the requirements to approve your portfolio
- Be unable to finish documenting the AXP through the hour documentation method
- All experience must have occurred post high school graduation or an established equivalent

Overview of Steps Toward Completing A

1. Complete the AXP Portfolio eligibility review application.
   a. In order for NCARB to determine if you are eligible, you need to:
      i. Identify your architect supervisor.
      ii. List all past work experiences from high school to present. You do not need an active NCARB record for the applicable period.

2. If NCARB determines that you are eligible to participate, you will need to:
   a. Log in to your My NCARB Record.
      i. If you do not have an NCARB Record, you will register for an NCARB AXP Portfolio eligibility reviewer and complete the next step.
      b. From your record, go to the experience tab and history from high school graduation to present.
      c. Submit experience reports and log in to your My NCARB Record.
   d. For experiences that are within the last five (5) years, you must report them via the hours method. These reports will need to include information on who was your supervisor at the time of the exp. You may use the employment history tab.

3. NCARB will contact you. Otherwise, your eligibility review will not be processed.

4. Complete the AXP Portfolio requirements.
   a. Every AXP task will require at least one exhibit that demonstrates your competency in that task. From the AXP Portfolio, you will be able to upload exhibits and assign your exhibit to a current architect supervisor.
   b. Your portfolio architect supervisor will review your exhibits and determine competency for each task.
   c. Once your portfolio reviewer is satisfied that you have demonstrated competent performance for each of the tasks, you will have satisfied NCARB’s experience requirement.
Documenting Your Experience Through the AXP Portfolio

Supervision Requirements

CURRENT ARCHITECT SUPERVISOR
If you are currently working for an architect, this person must serve as your AXP supervisor.

Your supervisor needs to meet the following requirements:
- Have an active license to practice architecture in one of the 54 NCARB jurisdictions for a minimum of six (6) months
- Have had a working relationship with you for a minimum of six (6) months

ARCHITECT MENTOR
If you are not currently working for an architect, your architect mentor may act as your architect supervisor to review and approve your portfolio.

Your mentor needs to meet the following requirements:
- Have an active license to practice architecture in one of the 54 NCARB jurisdictions for a minimum of one (1) year
- Have known you for a minimum of one (1) year

Exhibits
You will demonstrate competency in each of the exhibits. Exhibits will typically be PDFs and/or image files, certificates, word documents, etc.

You will need to have at least one exhibit associated with each area of practice. However, one exhibit can be associated with multiple areas of practice. You can view a list of potential exhibits for each area of practice on the website. This list is just a resource and not meant
to be exhaustive.
DOCUMENTING YOUR EXPERIENCE

Documenting Your Experience Through the AXP Portfolio

Employment History

You will create a history of work experience in your NCARB Record based upon the reporting requirement. Use the hour method to report all experience gained within the past five years. Then submit any experience older than five years through duration only. If you have already submitted experience reports, you will need to fill in the gaps to show eligibility for the portfolio.

The online reporting system will require a work setting and a supervisor name. You can use your current architect supervisor to approve past experience. Only include work experiences that meet the requirements of experience setting A or experience setting O.

As part of your eligibility for the portfolio, you will need at least two years of full-time experience that meets the requirements of the AXP gained outside of a five-year window from the date you request eligibility for the AXP Portfolio:

- Minimum of one year of Experience Setting A.
- Up to one year of any combination of the opportunities from Experience Setting O below:
  - Up to one year - Other Work Experience Under Licensed Professionals
  - Up to two months - Design or Construction Related Employment
  - Up to two months - Construction Work

Part-time experience will accrue at 50 percent toward the two-year requirement. You may need to provide a reference for each of the work experiences listed in your Record.

Best Practices for Completing the AXP ti

This process is only for people who have a body of the AXP but falls outside the reporting requirements.

It is best to collect exhibits for each of the tasks you finish this process prior to starting. Talk with your about expectations for your portfolio before submitting your experience.

Some portfolio supervisors prefer the exhibits being the documents you upload that states how this competency for the associated tasks.
EARNING YOUR LICENSE

Next Steps

The AXP is only one component that leads to licensure in the 54 NCARB jurisdictions. Make sure you are able to meet the education and examination requirements as well. For details on how to gain licensure, view the NCARB registration board requirements page.

Once you have received your license and it’s time to renew your NCARB Record, be sure to answer “yes” to the question: “Have you received a license to practice architecture since last renewal?” This will put you in the queue to get your Record evaluated for NCARB certification. For some jurisdictions, NCARB will need to send verification of your license. After we have all the necessary documents, your Record will be evaluated to determine if it meets the requirements for NCARB certification per the Certification Guidelines.

If you want to start this process prior to your next NCARB renewal, contact NCARB customer service after receiving your license.
