PROFESSIONAL EXPERIENCE

OUT OF ARCHITECTURE

2018 - Present Co-Founder and Managing Partner

Out of Architecture is a thought leadership platform and career resource network that redefines the value of architectural training in a rapidly evolving professional landscape. Co-founded by Erin Pellegrino, it has become a national voice on career diversification, producing widely recognized work—including a Routledge-published book, a podcast, and public programs—for architects navigating transitions into fields such as tech, strategy, and entrepreneurship. OOA partners with universities, the AIA, and media platforms to challenge conventional narratives and expand the reach of architectural thinking.

MATTER.

2013 - Present Founder and Principal

Matter is a design and fabrication studio rooted in the belief that building is a form of thinking. We approach making not as an afterthought, but as a primary mode of research, experimentation, and discovery—where craft and concept evolve in tandem.

Our practice operates across scales and disciplines—architecture, furniture, objects, spatial interventions, and sensorial experiences—bringing an iterative, hands-on process to each project. We are especially interested in the inventive use of standard materials, embracing non-standard assemblies and sustainable methods to reframe conventional building logic.

At Matter, design is not a linear progression from idea to execution, but a recursive dialogue between drawing, prototyping, and full-scale making. Our team is nimble, collaborative, and fully embedded in both the conceptual and physical aspects of production. Each project is treated as an opportunity to test, question, and reimagine how architecture can be made—and for whom.

We partner with community organizations, non-profits, schools, and government agencies to create meaningful design solutions that improve the lives of our clients, from the affluent to the underserved communities we live and work in.
